## Sourcing Plants

There are a number of sources of free or low cost eco-sourced native plants.

[GreenFleet](#) helps businesses to reduce the impacts of their vehicle fleet on the environment through tree planting initiatives. Contact them to request funding for trees.

[Honda](#) funds the planting of ten native trees for each car sold. The Honda Tree Fund is administered by Regional Councils. For more information contact your regional council or see the [Honda](#) website

[Project Crimson](#) supports the planning and conservation of trees, especially pohutukawa and rata. March 1 is the deadline each year for project submissions

[Local and regional councils](#). Some local and regional council's provide free ecosourced plants to community groups working on Council parks and reserves. See your local Council website for more information
